International
English School

International English School

The International English school in Sweden was founded in 1993 and is today the largest free school organization at the compulsory level ("Grundskolan") in Sweden. Almost 20 000 students attend our 29 schools around the country (2015). The International English School is dedicated to supporting students of all backgrounds to become productive and responsible citizens.

"I can't see how we could manage without an electronic invoice processing solution"

Eleonor Kälarne Nilsson,
Accounting Manager,
International English School

The International English School started using Palette already in 2006. Lack of search functionality, no possibility to trace historic data and need for automation made them start looking for an invoice processing solution like Palette. Formerly manually executed processes were quickly replaced with automated, meaning that invoices using predefined posting and flow proposals could pass directly to final booking in the ERP system.

Fast and easy handling

Today the International English School uses PalettInvoice for incoming supplier invoices and PaletteContract for contract handling and archiving. "I can't see how we would manage without an electronic invoice processing solution", says Eleonor Kälarne Nilsson, Accounting Manager. "We have 30 profit centers all around the country and by using Palette, we can quickly and easily send the invoices to the right school where they get checked, posted and signed".

User friendly and traceable

"Traceability is another thing that is very helpful to us – we can easily retrieve old invoices which facilitates when comparing costs and auditing. It's also very helpful that we always have access to our invoices wherever we are, as long as we have Internet access," Eleonor adds. "Me and my colleagues that uses PaletteInvoice, think it's a very user friendly system that is easy to understand and easy to learn", says Celina Lindberg at Accounts Payable.

Additional savings with e-invoice

In 2014 they chose to go one step further to make the entire process automated and today they also use PaletteE-invoice for sending and receiving invoices. By introducing e-invoices they have been able to automate invoice processing further. Instead of scanning paper invoices the invoices arrive electronically in the system, which not only provides greater time savings but also increases data quality compared to scanned

documents. And furthermore - it's environmentally friendly. "We have used PaletteE-invoice for about a year and a half and it was incredibly easy to implement. The support from Palette has been great from inviting suppliers to quick feedback when we've had questions about e-invoices", Celina Lindberg says. "We've managed to save up to 5-10 hours per week since we introduced einvoices. Every year we open new schools which also mean more invoices, but by implementing e-invoice it's been enough with one person for handling invoices which also means savings in personnel costs."

Great cooperation with Palette

The International English School is very pleased with the cooperation with Palette. "The support we have received from Palette is absolutely fantastic. The cooperation has been great with good service, they are always pleasant and accommodating", says Celina.

Palette Software

A software company founded 1993.

Palette is a market leading provider of financial process automation software with a large number of customers worldwide.

We help companies transform and automate their Purchase to Payment Processes utilising their existing ERP and finance system investment.

Palette has its offices in Sweden, Denmark, Norway, Finland, UK and USA.

Our Solutions

Palette solutions help automate transaction processing for invoices, contracts, purchase orders and expenses. With a digitised purchase to pay process, you achieve better control, lower costs, faster transaction processing and reduced manual intervention.

Clients can start with automating a certain part of their process, e.g. invoice processing and then add modules as they are needed. When your business grows, it is easy to add more modules from the PaletteArena product suite.
